My plant has a certified operator- required by law. So does the water treatment system. I spend- \$40,000 yearly on just salaries to have these guys show up and watch over the systems. The state requires our water operator be onsite like 2 hours daily, while his duties only take him about 15 minutes. The sewer plant needs to be checked daily- though we check it a few times a day.

Water lost through leaks, waste, or simple theft is referred to as non-revenue water, in that it fails to provide revenue to the water supplier because it never reaches its customers. These can be physical losses of water escaping the system, or unaccounted-for water that is not measured due to faulty meters and meters that have been tampered with, poor accounting and bookkeeping, or as a ...

Ultrasound is sound waves with frequencies higher than the upper audible limit of human hearing.Ultrasound is not different from "normal" (audible) sound in its physical properties, except that humans cannot hear it. This limit varies from person to person and is approximately 20 kilohertz (20,000 hertz) in healthy young adults. Ultrasound devices operate with frequencies from 20 kHz up to ...
