A turbofan typically has extra turbine stages to turn the fan. Turbofans were among the first engines to use multiple spools—concentric shafts that are free to rotate at their own speed—to let the engine react more quickly to changing power requirements. Turbofans are coarsely split into low-bypass and high-bypass categories. Bypass air ...

The design, the F3H-G/H was an advanced navy fighter proposal powered by twin Wright J65 turbojet engines, an armament suite of 4 x 20mm cannons and seating for one. At the time, the United States Navy was looking for a replacement of their core F3H Demon series with a more viable and capable type and took notice of the McDonnell attempt. The project began in 1954 and the USN ordered the F3H ...
